NetEnt launches Berryburst times two as it debuts MAX product line

NetEnt has launched Berryburst and Berryburst MAX – the first double release from its groundbreaking, mixed volatility product line.

Berryburst is a frenzy of floating and fluctuating fruity fragments in a 5-reel, 3-row video slot. It features the repeatedly successful Cluster Pays™ mechanic allowing players to see big wins together with the proven top performing expanding, stacked wild re-spins mechanic, but now across all 5 reels.

Berryburst MAX broadens the new game's appeal by offering a much higher win potential using the same NetEnt game mechanics as the regular version.

Henrik Fagerlund, Chief Product Officer at NetEnt, says: “The introduction of MAX is yet another industry-first created and delivered by NetEnt. We’ve listened to players and operators and know the importance diversifying the volatility in our game portfolio. With Berryburst and Berryburst MAX, operators can cater to different player needs in different areas of their offering, once again showing our position as the leader in slots innovation.”

“Berryburst delivers NetEnt’s superior gaming experience with an exciting audio and visual display that makes it the perfect launch title for our new product range.”
