NetEnt releases super sci-fi slot Wild-O-Tron 3000™

Set in a 1960s robot lab, Wild-O-Tron 3000™ is a science fiction-themed video slot that transports players to a time when the genre was popularised.

Wild-O-Tron 3000 celebrates the simplicity of slots, evoking memories of classic sci-fi films and television programmes and, of course, Wild Symbols everywhere!

The 5-reel, 3-row, 20 fixed payline game features Wild substitutions and stacked symbols, as well as the random Wild-O-Tron feature, which can be activated by any spin. Once triggered, the Wild-O-Tron machine emits a lightning bolt that lights up and transforms the reels adding Wilds all over the reels.

“Packed with cyborgs and transforming robots, Wild-O-Tron 3000 will resonate with sci-fi fans and gamers that love stacks and Wild symbol driven games,” **says Bryan Upton, NetEnt Director of Game Products.**

“With easy-to-understand, obvious player value mechanics, a medium volatility profile and an interesting graphics package, this game can offer an all-round fun, entertaining experience with strong potential for big wins.”
