## NetEnt takes Victorious to the MAX

Original Roman-themed game was one of industry's earliest mobile-first titles – back in 2012

NetEnt has relaunched Victorious™ as Victorious MAX™, breathing new life into a classic casino title that was one of the company's initial mobile-first games.

For more than seven years, Roman empire-themed Victorious has been a strong performer and the addition of the MAX volatility setting gives players a second option of play, increasing the potential win from x1500 bet to x7000 bet. Victorious is the first NetEnt game where players can switch between the two versions of volatility easily, while in the game.

Victorious MAX is a 5-reel slot with 243 bet ways offering slots fans more routes to possible wins. It joins other games such as Dead or Alive 2 being boosted with higher volatility as part of NetEnt's MAX portfolio.

“NetEnt has been at the forefront of innovation-first games development for 20 years, leading the way in creating optimized, player driven content. Taking a 2012 classic like Victorious and now adding the game to our high-volatility MAX portfolio means that this Roman empire-styled slot is set to gain a new army of fans,” said **Bryan Upton, NetEnt Director of Games**.
