# NetEnt unveils groundbreaking Community Jackpot System: Starburst PowerPots

Supplier to launch a highly customizable, Community Jackpot system where players collect Starburst tokens across an entire family of NetEnt's best performing games for a range of prizes.

NetEnt has developed an innovative new jackpot concept that allows players to collect Starburst tokens across multiple casino brands and games for a chance to bag a community jackpot with other players.

Players will play together to fill up the PowerPots progress bar to trigger the community pot divided among any number of players – even if they happen to be offline.

All games within the family share the state and jackpot values, including an additional Major progressive jackpot. The platform is designed with maximum configurability for operators, offering multiple RTP configurations, contributions and prize set ups as well as the ability to tailor the user interface to match their casino brand.

“Starburst PowerPots was developed in line with our customers’ and players’ expectations, taking cue on everything from art assets to mechanics. We are using leading edge games design approaches to make this jackpot family with our most powerful games simple to understand yet compelling. Using the Starburst brand will create massive acquisition while these jackpot mechanics will drive huge engagement for players,” **said Bryan Upton, NetEnt Director of Games.**

“This is community gaming without the overengineering and overthought on what slot players really want. This product can fit into any operator’s portfolio and deliver any experience, from large life changing prizes to super-fast hitting jackpots,” added Upton.
